Results 1 - 17 of 17 short listing

- 1** Technologies for augmented reality systems: realizing ultrasound-guided needle biopsies 91%

Andrei State , Mark A. Livingston , William F. Garrett , Gentaro Hirota , Mary C. Whitton , Etta D. Pisano , Henry Fuchs

Proceedings of the 23rd annual conference on Computer graphics and interactive techniques August 1996
- 2** Superior augmented reality registration by integrating landmark tracking and magnetic tracking 83%

Andrei State , Gentaro Hirota , David T. Chen , William F. Garrett , Mark A. Livingston

Proceedings of the 23rd annual conference on Computer graphics and interactive techniques August 1996
- 3** Interaction: VRID: a design model and methodology for developing virtual reality interfaces 82%

Vildan Tanriverdi , Robert J.K. Jacob

Proceedings of the ACM symposium on Virtual reality software and technology November 2001

Compared to conventional interfaces, Virtual reality (VR) interfaces contain a richer variety and more complex types of objects, behaviors, interactions and communications. Therefore, designers of VR interfaces face significant conceptual and methodological challenges in: a) thinking comprehensively about the overall design of the VR interface; b) decomposing the design task into smaller, conceptually distinct, and easier tasks; and c) communicating the structure of the design to software develo ...
- 4** Pervasive computing and virtual reality: Outdoor virtual reality 80%

Bruce H. Thomas , Wayne Piekarski

Proceedings of the 1st international symposium on Information and
